Globa

Playing with light and colors, changing the perspective. Globa is a blown methacrylate hanging lamp with an internal metal reflector that has been produced using the spin-forming process and subsequently processed with a 3D laser. The luminous effect has been achieved by placing pieces of 3M "Radiant Color Film" between the reflector and the sphere, creating colored reflections that change depending on the viewing angle.

Designed by Chilo Valbonesi Ventrucchi

Lamp : 1 x 100W E27 220V 50Hz

Colour : Metacrilato Trasparente
