

SIPTEL

Giulio Iacchetti, 2016

Siptel is a family of lamps which offers a new interpretation of traditional models by making use of a simple yet effective system of magnets. The entire length of the lamp stem acts as a runway for the lamp head, which slides up and down with surprising smoothness and fluidity. Fitted with LEDs, the lamp gives off a warm, easily adjustable light for maximum expression of the FontanaArte philosophy of generating pleasing, flexible objects that focus on the user and a personal experience of light. Siptel comes in table, floor and wall versions.

TECHNICAL SHEET

Table lamp. The distinguishing feature is the illuminated element which, thanks to a system of magnets, runs freely up and down the vertical support for convenient positioning. Five meters of cable make it possible to use the illuminated element on its own, independently of the vertical mount, and applied to any magnetic surface. Light levels can be regulated to $\pm 155^\circ$. The lamp is in metal, available with white, red orange or black matt finish. Cable and clip in black. Black on/off switch positioned on the head. Plug is also black.

MODEL NAME: Siptel

CODE: M4336.. + T4336..

DIMENSIONS: h. 60 cm

MATERIALS: Aluminium

COLORS

● Black - RAL Code: RAL 9005 Matt
